

Homyz Platform — Database Structure & Schema Reference

Engine: PostgreSQL | ORM: Prisma 7 | Generated Architecture Document

Component	Specification / Details
Database Provider	PostgreSQL (Hosted via Prisma Client Generator)
ORM Framework	Prisma 7 (Output: generated/prisma)
Primary Domain Models	User, Listing, Booking, HostRegistrationRequest, HostComplianceCheck, AuditLog
Security & RBAC	AdminRole, AdminPermission, AdminRolePermission, HostPermissionOverride, AdminPermissionOverride
Auth & Identity	Account, Session, VerificationToken, OtpCode, PasswordResetToken, RefreshToken

1. System Enumerations (Enums)

Enum Name	Values
Role	ADMIN, HOST, USER
UserStatus	ACTIVE, SUSPENDED, INVITATION_PENDING
BookingStatus	PENDING, CONFIRMED, CANCELLED
ListingStatus	DRAFT, IN_PROGRESS, PENDING_REVIEW, CHANGES_REQUESTED, APPROVED, REJECTED, ACTIVE
HostingType	HOME, EXPERIENCE, SERVICE
HostRegistrationStatus	PENDING, IN_REVIEW, WAITING_FOR_DOCUMENTS, DOCUMENTS_UNDER_REVIEW, APPROVED, REJECTED
HostDocumentStatus	PENDING, VERIFIED, REJECTED, EXPIRED
HostComplianceStatus	PENDING, UNDER_REVIEW, ACTION_REQUIRED, COMPLIANT, NON_COMPLIANT
ComplianceCheckStatus	PENDING, PASSED, FAILED
ComplianceIssueSeverity	LOW, MEDIUM, HIGH, CRITICAL
ComplianceIssueStatus	OPEN, UNDER_REVIEW, RESOLVED, REJECTED
AdminInvitationStatus	PENDING, ACCEPTED, EXPIRED, REVOKED, FAILED
OtpChannel	SMS, EMAIL
OtpPurpose	PHONE_VERIFICATION, LOGIN, PASSWORD_RESET

2. Database Models & Schema Specifications

Model: User

Primary user account (Host, Admin, or Guest traveler). Manages identity, authentication credentials, permissions, and relations.

Field / Column	Data Type	Description & Rules
id	String (CUID)	Primary key
name, email, phone	String	Contact identity fields (@unique email & phone)
role	Role (Enum)	ADMIN HOST USER (default: USER)
status	UserStatus (Enum)	ACTIVE SUSPENDED INVITATION_PENDING
passwordHash	String	Hashed authentication password

adminRoleId	String (FK)	Reference to AdminRole table
createdAt, updatedAt	DateTime	Timestamps

Model: Listing

Host property listing. Contains multi-step onboarding data, location, pricing, rules, photos, discounts, and approval state.

Field / Column	Data Type	Description & Rules
id	String (CUID)	Primary key
hostId	String (FK)	Host User relation (User.id)
title, description	String / Text	Listing name and full text overview
price	Int	Nightly base price in minor currency units (cents)
status	ListingStatus (Enum)	DRAFT PENDING_REVIEW APPROVED REJECTED ACTIVE
hostingType, listingType, propertyType	String	Property categorizations (e.g., Home, Apartment, Entire place)
address, city, district, country	String	Property location details & coordinates
guests, bedrooms, beds, bathrooms	Int	Capacity & room counts
photos, amenities, houseRules	String[]	Media URLs array, amenity tags, house rules
weekendPrice, discounts	Int / Json	Custom weekend rates & weekly/monthly discount settings
checkInMethod, checkInStart, checkInEnd	String	Smart lock, keypad entry, and check-in window times

Model: Booking

Reservation record between a Guest (User) and a Host Property (Listing).

Field / Column	Data Type	Description & Rules
id	String (CUID)	Primary key
userId	String (FK)	Guest User relation
listingId	String (FK)	Reserved Listing relation
status	BookingStatus (Enum)	PENDING CONFIRMED CANCELLED
startDate, endDate	DateTime	Reservation check-in and check-out dates

Model: HostRegistrationRequest

Host onboarding application & lifecycle management record (intake, document reviews, compliance checks).

Field / Column	Data Type	Description & Rules
id, applicationId	String (CUID)	Unique request and application identifiers
applicantName, applicantEmail, applicantPhone	String	Host applicant contact details
status	HostRegistrationStatus (Enum)	PENDING IN_REVIEW DOCUMENTS_UNDER_REVIEW APPROVED REJECTED
complianceStatus	HostComplianceStatus (Enum)	PENDING UNDER_REVIEW COMPLIANT NON_COMPLIANT
assignedReviewerId	String (FK)	Assigned Admin reviewer User relation
hostId	String (FK)	Linked User account upon approval

Model: HostRegistrationDocument

Uploaded verification documents (Government ID, Proof of Address, Business License, Property Deed).

Field / Column	Data Type	Description & Rules
id	String (CUID)	Primary key
requestId	String (FK)	Relation to HostRegistrationRequest
documentType	String	GOVERNMENT_ID PROOF_OF_ADDRESS BUSINESS_LICENSE PROPERTY_DEED
fileName, fileUrl, mimeType, fileSize	String / Int	Uploaded file metadata & storage URL
status	HostDocumentStatus (Enum)	PENDING VERIFIED REJECTED EXPIRED
expiryDate	DateTime	Document expiration date

Model: HostComplianceCheck & HostComplianceIssue

Verification checks (Identity, Address, Docs) and flagged compliance issues (Address Mismatch, Sanctions).

Field / Column	Data Type	Description & Rules
checkKey, checkName	String	Check type identifier (e.g., IDENTITY_VERIFIED)
status	ComplianceCheckStatus / ComplianceIssueStatus	PASSED FAILED / OPEN UNDER_REVIEW RESOLVED
severity	ComplianceIssueSeverity (Enum)	LOW MEDIUM HIGH CRITICAL

Model: AdminRole, AdminPermission, AdminRolePermission

Role-Based Access Control (RBAC) matrix defining permissions for Admin Panel users.

Field / Column	Data Type	Description & Rules
name, slug	String	Role identifier (e.g. Super Admin, Support Agent)
module, action	String	Permission scope (e.g. module: HOSTS, action: READ)

Model: HostPermissionOverride & AdminPermissionOverride

Fine-grained individual permission overrides for specific Hosts or Admins.

Field / Column	Data Type	Description & Rules
hostId / adminId	String (FK)	Target User relation
permission	String	Permission key string
effect	String	ALLOW or DENY

Model: AuditLog

Comprehensive security and operational audit trail for all administrative and system actions.

Field / Column	Data Type	Description & Rules
actorId, actorEmail	String	User performing the action
action, resourceType, resourceId	String	Action performed (e.g. UPDATE_LISTING, APPROVE_HOST)
status, ip, userAgent, metadata	String / Json	Execution result, client IP, metadata JSON payload
